geodesic
+ hypercycles
unstable at every spacing
($|\kappa| \le 1/\sqrt{2}$)
circles (rings)
hypercycle rows: $\ell_{\mathrm{hyp}}(\kappa)$
sufficient bound $\ell_A(\kappa)$
rings ($\coth r_*(N), \ell_N$), $N = 8..64$
horocycle row $(1, \ell_*)$
arc spacing ℓ
geodesic curvature κ of the carrying curve
